

Marketing Analytics & Attribution Framework Project

Objective:

To analyze multi-channel marketing performance and evaluate the effectiveness of Email, Social Media, Paid Search, and Display Ads campaigns using key marketing KPIs and attribution logic.

Tools Used:

- Google Sheets (Excel equivalent)
- Basic Data Analysis
- Visualization Charts

Key KPIs Calculated:

- CTR (Click Through Rate)
- CPC (Cost Per Click)
- CAC (Customer Acquisition Cost)
- ROAS (Return on Ad Spend)

Key Findings:

- Email marketing delivered the highest ROAS and conversion efficiency.
- Paid Search generated the highest revenue contribution.
- Social Media showed moderate performance.
- Display Ads showed the lowest ROI.

Conclusion:

The analysis provides clear insights for budget optimization, recommending increased investment in Email and Paid Search while optimizing or reducing Display Ads.
